Fire Solutions

Comprehensive Support for Fire Protection Engineers

Siemens Industry, Inc.

A Dedicated Team

Professional

Accessible

Responsive

Experienced

Succeed with the Siemens EngineeringAdvantage™ Program

EngineeringAdvantage™ is a comprehensive program of support and tools designed to meet the needs of fire consulting engineers.

Our EngineeringAdvantage™ team is passionate about the work they do for fire consulting engineers. Their sole purpose is to ensure that the consulting community has the tools and knowledge it needs to exceed the expectations of their clients. You can count on the EngineeringAdvantage™ program to support your organization.

This program includes many benefits to consulting engineers such as:

- Dedicated and experienced management team
- Educational presentations
- New product technologies
- EngineeringAdvantage™ tool kit
- Application and specification tools

Siemens Fire Safety

- Fire Alarm and Detection Systems
- Voice Evacuation Systems
- Emergency Notification Systems
- Special Application Suppression Systems
- Smoke Control

Siemens Fire Safety's direct sales offices and distribution network, offer you over 250 locations in the US. We also have a global presence as part of Siemens, with over 450,000 employees, allowing us to extend our support to over 190 countries.

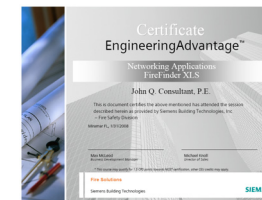

Siemens Fire Safety's focus is on the protection of life, property and business continuance from the threat of fire. Our commitment is to provide the best in design, manufacturing, quality, cost effective products and services in the life safety industry. We have introduced many "firsts" in Life Safety, from the first ionization smoke detector in North America in the 1950s, to the first analog addressable fire alarm system. You can count on Siemens Fire Safety, to be your ideal partner, for your local and global project needs.

Siemens Dedicated and Experienced Management Team

EngineeringAdvantage™ partners have a dedicated representative focused on meeting their needs. Your representative will ensure that you receive consistent communications and there is continuity with our local office network. Siemens Fire Safety can support your team nationally and globally. Wherever you do business, we are there to help you serve your clients.

Educational Presentations

Siemens' educational program helps you attain the perfect balance between theory and practice. Stay on top of the latest technologies, gain from our experience in real world applications, share updates on the latest codes and trends, and design cost effective code conscious solutions.

These educational sessions are provided in various subjects throughout the year. Certificates will be issued for each session, for use in applying for CEU and CPD credits.

Application and Specification Tools

The SpecWriter™ tool provides an easy way to create functional specifications to meet the needs of your specific project or performance based solution. This Windows™-based tool allows anyone to easily create client appropriate custom specifications, quickly and accurately.

Engineers have questions Siemens has answers...

Siemens Fire Safety understands that fire consulting engineers require a relationship with a proven industry leader. You must stay on top of the latest trends and technologies impacting your engineering decisions. The Siemens EngineeringAdvantage™ team will help you deliver technical excellence, risk reduction, cost effective solutions, application options and on-time performance to your clients.

New Product Technologies

EngineeringAdvantage™ will ensure your team is regularly updated with the latest data sheets, product CDs, product bulletins and announcements.

EngineeringAdvantage™ Life Safety Seminars also provide your team with the necessary knowledge to apply existing and new product technologies.

EngineeringAdvantage™ Tool Kit

Our fire consulting engineer partners receive the EngineeringAdvantage™ tool kit, which is designed to change with the needs of the engineering community. This tool kit allows your engineering team to refer to one central point for all the materials and tools provided.

Join EngineeringAdvantage™ Now

As an EngineeringAdvantage™ partner we will meet with your offices each quarter to review new technologies, industry trends, provide one on one support for challenging projects and conduct a new continuing education program. Updates and new programs will also be added to your tool kit and technical library. New EngineeringAdvantage™ tools and enhancements will be reviewed with your entire team every three months!
